EXECUTIVE BOARD OF EDITORS FOR TETRAHEDRON PUBLICATIONS

Chairman: **Professor Sir Derek Barton, FRS**
Texas A & M University, Chemistry Department, PO Box 300012, College Station, TX 77842-3012, USA

Professor Sir J. E. Baldwin, FRS, Dyson Perrins Laboratory, Oxford OX1 3QY, UK

Professor D. L. Boger, Department of Chemistry, The Scripps Research Institute, La Jolla, CA 92037, USA

Professor L. Ghosez, Laboratoire de Chimie Organique de Synthèse, Université Catholique de Louvain, B-1348 Louvain-la-Neuve, Belgium

Professor A. R. Katritzky, FRS, Department of Chemistry, University of Florida, Gainesville, FL 32611, USA

Professor N. K. Kochetkov, N. D. Zelinsky Institute of Organic Chemistry, Academy of Sciences, Moscow B-334, Russia

Professor Lin Guo-Qiang, Shanghai Institute of Organic Chemistry, Academia Sinica, Shanghai 200032, China

Professor S. F. Martin, Department of Chemistry and Biochemistry, University of Texas, Austin, TX 78712, USA

Professor W. B. Motherwell, Department of Chemistry, University College, 20 Gordon Street, London WC1H 0AJ, UK

Professor G. Ourisson, Centre National de la Recherche Scientifique, Centre de Neurochimie, 67084 Strasbourg, Cedex, France
(Associate Editor, Professor G. Solladié)

Professor G. H. Posner, Department of Chemistry, Johns Hopkins University, Baltimore, MD 21218, USA

Professor M. Shibasaki, Faculty of Pharmaceutical Sciences, University of Tokyo, 7-3-1 Hongo, Bunkyo-ku, Tokyo 113, Japan

Professor T. Shioiri, Faculty of Pharmaceutical Sciences, Nagoya City University, Tanabe-dori, Mizuho-ku, Nagoya 467, Japan

Professor W. Steglich, Institut für Organische Chemie der Universität München, Karlstr. 23, D-80333 München, Germany

Professor R. J. K. Taylor, Department of Chemistry, University of York, Heslington, York YO1 5DD, UK

Professor E. J. Thomas, Department of Chemistry, University of Manchester, Oxford Road, Manchester M13 9PL, UK

Professor H. H. Wasserman, Department of Chemistry, Yale University, PO Box 208107, New Haven, CT 06520-8107, USA
(Associate Editor, Professor D. P. Curran)

Professor C.-H. Wong, Department of Chemistry, The Scripps Research Institute, La Jolla, CA 92037, USA

Professor Y. Yamamoto, Department of Chemistry, Faculty of Science, Tohoku University, Sendai 980-77, Japan
(Associate Editor, Professor M. Hirama)

TRANSFER OF COPYRIGHT AGREEMENT

Scientific publishers and authors share a common interest in the protection of copyright: authors principally because they want their creative works to be protected from plagiarism and other unlawful uses, publishers because they need to protect their work and investment in the production, marketing and distribution of the article written by the author. In order to do so effectively, publishers need a formal written transfer of copyright from the authors(s) for each article published. Publishers and authors are also concerned that the integrity of an article (once refereed and accepted for publication) be maintained, and in order to protect that reference value and validation process, we ask that authors recognize that distribution (including through the Internet/WWW or other on-line means) of the version of the article as accepted for publication is best administered by the publisher. This transfer includes the right to adapt the article for use in conjunction with computer systems and programs, including reproduction or publication in machine-readable form and incorporation in retrieval systems.

Rights of authors

Elsevier Science LTD recognizes the retention of the following rights by the author(s):

1. Patent and trademark rights and rights to any process or procedure described in the article.

2. The right to photocopy or make single electronic copies of the article for their own personal use, including for their own classroom use, or for the personal use of colleagues, provided that the copies are not offered for sale and are not distributed in a systematic way outside of their employing institution (e.g. via an e-mail list or public file server). Posting of the article on a secure network (not accessible to the public) within the author's institution is permitted. However, if a prior version of this work (normally a preprint) has been posted to an electronic public server, the author(s) agree not to update and/or replace this prior version on the server in order to make it identical in content to the final published version, and further that posting of the article as published on a public server can only be done with Elsevier's written permission.

3. The right, subsequent to publication, to use the article or any part thereof free of charge in a printed compilation of works of their own, such as collected writings or lecture notes, in a thesis, or to expand the article into book-length form for publication.

Authorship

If the article was prepared jointly with other author(s), the signing author has informed the co-author(s) of the terms of this copyright transfer and is signing on their behalf as their agent and represents that he or she is authorized to do so. Please confirm by marking the appropriate box following the signature line. The signing author shall bear the responsibility for designating the co-author(s) and must inform Elsevier Science of any changes in authorship.

If copyright is held by the employer, the employer or an authorized representative of the employer must sign. If the author signs, it is understood that this is with the authorization of the employer and the employer's acceptance of the terms of the transfer. Please confirm by marking the appropriate box following the signature line.

If there are a number of co-authors, one or several of whom is/are a U.K. or a U.S. Government employee (and this work was prepared in such capacity) and one or several of whom are not government employees, the non-government author should sign this form, indicating transfer of those rights which such author has (also on behalf of any other non-government co-authors). U.K. government employee authors may elect to transfer copyright in any event, and if they do so elect should indicate below. Please confirm by marking the appropriate box following the signature line.

Warranties

The author(s) warrant(s) that the article is the author's original work and has not been published before. The author(s) warrant(s) that the article contains no libellous or other unlawful statements, and does not infringe on the rights of others. If excerpts from copyrighted works are included, the author(s) has (have) obtained or will obtain written permission from the copyright owners and will credit the sources in the article.

TETRAHEDRON: *Asymmetry*

The International Journal for Rapid Publication on all Aspects of Asymmetry in Organic, Inorganic, Organometallic, Physical and Bio-organic Chemistry

AIMS AND SCOPE

Tetrahedron: Asymmetry presents experimental or theoretical research results of outstanding significance and timeliness on asymmetry in organic, inorganic, organometallic and physical chemistry, as well as its application to related disciplines, especially bio-organic chemistry.

The journal will publish critical reviews, original research articles and preliminary communications dealing with all aspects of the chemical, physical and theoretical properties of non-racemic organic and inorganic materials and processes.

Topics relevant to the journal include:

- the physico-chemical and biological properties of enantiomers;
- strategies and methodologies of asymmetric synthesis;
- resolution;
- chirality recognition and enhancement;
- analytical techniques for assessing enantiomeric purity and the unambiguous determination of absolute configuration; and
- molecular graphics and modelling methods for interpreting and predicting asymmetric phenomena.

Papers describing the synthesis or properties of non-racemic molecules will be required to include a separate statement, in the form of a Stereochemistry Abstract, for publication in the same issue, of the criteria used for the assignment of configuration and enantiomeric purity.
